

Cellular Technology, Mapping & Analysis Class

Training specific to understanding cellular networks and the information they provide. This class will provide an in-depth look into cellular networks and call detail records (CDR's) from any cell phone provider. We will teach you to understand the information, how to use the information, and why it is critical to your investigations.

WHAT YOU LEARN

- Learn the basics of mapping CDR's
- Learn how to use advanced reports (PCMD, RTT & EVDO) to obtain a more accurate location
- Learn how cellular networks communicate with cell phones
- Learn how to find out who's talking to who
- Learn how LTE has changed cellular networks and the records you use

Hawk Analytics is dedicated to making the investigations for law enforcement agencies throughout the U.S. faster, more informative and precise.

South Central Region

Greater Dallas (TX) Area
