40-Hour Course

Details

Hosted By Hawk Analytics

This class is the Hawk Analytics flagship training course covering an in-depth review of the cellular technology infrastructure from basic to advanced topics as well as a complete review of CellHawk. This class is designed for those investigators and analysts who have a basic understanding of cellular technology and may have already been using CellHawk in their casework. We will go deeper into the cellular technology and variety of records, as well as more hands-on labs and different types of records. You do not need to be a CellHawk customer to attend this class.

Students will be provided CellHawk training accounts to be used during the class, along with an e-student folder with handouts, labs, useful links and a PDF e-Book.

\$995 per attendee

"A really great class that is necessary for where the industry is headed. Technology is not going to get any less complicated so to understand it is a must. Thank you."

- February 2020 Student
